Specialists in Chemical Logistics, CEA have a proven track record in chemical and hazardous chemical transportation, and the international logistics commonly associated with the sector.

Our highly skilled and experienced teams provide an in-house solution to chemical specific storage and transportation of ISO tanks, cryogenic tanks, drums, IBC's, tote tanks and bulk tankers. We pride ourselves on our safety and compliance policies and processes which have become a key factor to our success.

Due to our strategic locations throughout the ASEAN region and our in-depth knowledge of cross-border trade between Thailand, Vietnam, Myanmar, Laos, Cambodia and Malaysia, we can guarantee our customers peace of mind thanks to our experience and understanding of the complex processes involved in the transportation and storage of chemicals.
